Boatsense Solutions Announces the Installation of Wireless Remote Vessel Monitoring Systems in Moran Tugboats and Interlake Steamship Vessel

Boatsense Solutions, Inc. announced today that it recently installed its wireless remote vessel monitoring system on several Moran Towing Corporation's tugboats. Moran is the oldest and largest supplier of tugs on the U.S. East and Gulf coasts. Moran maintains three major lines of business: ship docking, contract towing and marine transportation. Approaching its 150th anniversary, Moran operates in 16 ports with an extensive fleet of tugs and barges, and continues to set the pace in towing and transportation. www.morantug.com

Separately, Boatsense announced a recent installation of its remote monitoring system on the 767 foot Str. Kaye E. Barker. Owned and operated by The Interlake Steamship Company, the Kaye E. Barker's bilge and power is remotely monitored by Boatsense. Founded in 1913, Interlake owns and operates 10 ships on the Great Lakes where it continues to be a major commercial force. www.interlakesteamship.com

Boatsense is proud to put its unique technology to work for these two world-class companies. Boatsense's technology enables property owners and managers to remotely monitor the vital signs of their most important assets, and alerts them of conditions that require attention before incurring significant loss or damage. The Boatsense device is connected to and monitors key systems including the boat's position based on the Global Positioning System (GPS). The device is programmed and sends alerts through the Boatsense Monitoring Network using the Simple Messaging Service (SMS) that is now universal on cellular phones worldwide (nearly global coastal coverage). With Boatsense, the boat is continuously monitored and the owner, marina management and other groups are able to receive alerts when a vessel is at risk.

Boatsense Solutions was founded in 2005 by two Maine Maritime graduates. Beyond marine applications, Boatsense's devices are used by property and equipment owners and managers.
